

# FIRST CONTACT CLINICAL

ENABLING HEALTHY CHANGE

## What is social prescribing?

- Social prescribers provide **support** by having conversations about **what matters to you**.
- We can support by helping you **improve** your **social**, **emotional**, and **physical wellbeing**.
- We work closely with you to ensure the **development** of **knowledge**, **skills**, and **confidence**.
- We achieve this by **having 1-to-1 appointments** and can use **skills** to **connect** and **refer into additional services**.

If you would like to find out more about our service or self-refer to the social prescribing team, you can do so by scanning this QR code calling us on 0191 4329838.
